

White River Regional Solid Waste Management District

P.O. Box 2396 Batesville, Arkansas 72503 phone 870/793-5233 fax 870/793-4035

March 27, 2013

Benjamin T. Jones, Chief
ADEQ - Solid Waste Division
5301 Northshore Drive
North Little rock, Arkansas 72118-5317

Dear Mr. Jones:

Enclosed you will find the White River Regional Solid Waste Management District's 2013 Needs Assessment which follows the Guidelines for Needs Assessment for Regional Solid Waste Management Districts. We appreciate the extension until March 31st to complete our draft document.

If you have any questions, please contact Jan Smith or Sarah Sexton at 870-793-5233.

Sincerely,

Van C. Thomas
Executive Director

**White River Regional Solid Waste Management District
Regional Solid Waste Needs Assessment
March 2013**

1. Demographics

1.1. Map of District

1.1.1. District map of Class 1 cities included in Appendix A.

1.1.2. District maps showing locations of landfills, transfer stations, recycling facilities and permitted municipal composting sites are included in Appendix A, Tables 1-2 through A-8.

1.2. Census Data (All totals and projections based upon U.S. Census data)

1.2.1. 2010 Census population of the District is 237,844.

1.2.2. District population increased by 44,808 or 23% from 1990 to 2010, as shown in Appendix B, Table B-1.

1.2.3. Estimated District population change from 2010 to 2020 is projected to be significantly less than in the previous two decades, with an estimated modest increase of 10,790, or 4.54%. See Appendix B, Table B-1.

1.2.4. The White River District has 116,884 housing units, of which 95,714, or 82%, were occupied per the 2010 Census. See Appendix B, Table B-2.

2. Administrative Structure

2.1. Board Composition

2.1.1. The White River RSWMD is governed by a twenty-six member Board of Directors consisting of the ten county judges, the mayors of the District's cities with a population over 2,000, first class cities, and the largest city in each county within the District. Time of service is based on election as judge or mayor and not board tenure. The White River Board of Directors for 2013 is as follows:

Judge Jerry Holmes, Cleburne County

Judge Charles Willett, Fulton County

Judge Robert Griffin, Independence County

Judge David Sherrell, IZARD County
Judge Jeff Phillips, JACKSON County
Judge Larry Brown, SHARP County
Judge Stacey Avey, Chairman, STONE County
Judge Roger Hooper, VAN BUREN County
Judge Michael Lincoln, Vice-Chairman, WHITE County
Judge Charles Dallas, WOODRUFF County
Mayor Rocky Tidwell, City of Augusta
Mayor Doyle Wallace, City of Bald Knob
Mayor Rick Elumbaugh, Sec./Treas., City of Batesville
Mayor Mike Robertson, City of Beebe
Mayor Lloyd Hefley, City of Cherokee Village
Mayor Roger Rorie, City of Clinton
Mayor Paul Wellenberger, City of Fairfield Bay
Mayor Jackie McPherson, City of Heber Springs
Mayor Bob Barnes, City of Horseshoe Bend
Mayor Rickey Veach, City of Judsonia
Mayor Doyle Fowler, City of McCrory
Mayor Ron Sterling, City of Mountain View
Mayor David Stewart, City of Newport
Mayor Gary Clayton, City of Salem
Mayor David Morris, City of Searcy
Mayor Larry Bowen, City of Tuckerman

- 2.1.2. All Board members are elected officials. There are no appointed Board members.
- 2.1.3. The White River Board of Directors does not use advisory boards, committees or other entities aside from District staff.

2.1.4. Board Meetings

- 2.1.4.1. The White River RSWMD Board meets quarterly.
- 2.1.4.2. Meetings are at various locations throughout the District.
- 2.1.4.3. The public is notified through the District's major newspapers two weeks in advance of meetings.
- 2.1.4.4. Information concerning the Board's meetings is available at the District office.

2.2. Public Participation

- 2.2.1. Board meetings are open to the public and public input is encouraged and allowed at all meetings.
- 2.2.2. Public input is solicited through legal notices to newspapers on all major board actions, including policies and procedures, certificate of need and grant applications, and the use of subcontractors to conduct District activities.
- 2.2.3. The District Board meets in different locations throughout the ten county area, and local business, industry, officials are personally invited to attend meetings by host county members and by District staff. Solid waste industry representatives and other interested parties are routinely notified of meetings upon request.
- 2.2.4. Certificate of Need public input and participation procedures are detailed in the District's Policies and Procedures. They include a thirty day public notice in the newspaper(s) of the area affected and a publicized public hearing in the area to solicit comments, which are presented to the Board prior to action being taken on any Certificate of Need request.

2.3. District Administrative Staff

- 2.3.1. The White River Regional Solid Waste Management Board has entered into an agreement with the White River Planning and Development District to provide support services. Several of the staff members of the White River Planning and Development District serve as staff to assist the District in solid waste

management related issues. The staff members involved in solid waste management issues are:

Van C. Thomas, Executive Director
Jan Smith, Solid Waste Management Program Director
Sarah Sexton, Solid Waste and Recycling Education Coordinator
Mike Clark, Solid Waste Management Coordinator

2.3.2. All staff are full time employees of the White River Planning and Development District with years of solid waste experience and are knowledgeable in the history and development of solid waste law in Arkansas.

2.4. Contractors, Consultants, Service Providers and Volunteers

2.4.1. The Board of Directors contracts with the White River Planning and Development District to provide administrative support to the District. The White River Planning and Development District employs the District Solid Waste Program Director and other staff to provide these services. The Executive Director of the Development District is the Executive Director of the White River Regional Solid Waste Management District.

2.4.2. Not applicable.

2.4.3. Yes. See 2.4.1. above.

2.4.4. The White River Regional Solid Waste Management Board has entered into an agreement with the White River Planning and Development District (WRPDD) to provide support services.

2.4.5. See 2.3.1. above.

2.4.6. The District does not employ volunteers. Volunteer programs are employed at the local government level.

2.5. Solid Waste Authorities

2.5.1. The District has one authority, the Tri-County Solid Waste Authority, that operates the Tri-County Recycling Center.

2.5.2. The Tri-County Board is made up of the county judges and mayors of Fulton, Izard and Sharp County.

2.5.3. The Tri-County Authority was created to operate a three-county recycling center and collection program. The provision of this

service in Fulton, Izard and Sharp Counties meets the goals and objectives of the ten-county, White River Regional Solid Waste Management District Board.

2.5.4. The three county judges and three mayors also serve on the White River RSWMD Board of Directors.

- 2.5.4.1. Fulton County Judge Charles Willett
- Izard County Judge David Sherrell
- Sharp County Judge Larry Brown
- Cherokee Village Mayor Lloyd Hefley
- Horseshoe Bend Mayor Bob Barnes
- Salem Mayor Gary Clayton

2.6. Administrative Procedures and Other Documents

2.6.1. The White River District Policies and Procedures are approved by the Board of Directors. The District followed state recommended process in place at the time of adoption. District Policies and Procedures were adopted by the Board of Directors on December 16, 2004, after a thirty-day public notice and public comment period.

2.6.2. The Board of Directors, interested parties and the general public were provided input into the development of the Districts rules, regulations and procedures through Board notification and a thirty day public notice and input period. District Policies and Procedures are public records available through FOI request.

2.6.3. District Policies and Procedures are found in Appendix C.

2.7. Administrative Funding

2.7.1. Funding sources are as follows:

a. Recycling Grants -	\$ <u>567,827.00</u>
b. Waste Tire Grants -	\$ <u>384,337.55</u>
c. Other grants (identify Source) _____	\$ _____
d. Total administrative funds from Grants	\$ <u>952,164.55</u>

Next, list all administrative fees levied and collected by the District.

Source	Most Recent Annual Dollar Amount	% of total
--------	----------------------------------	------------

ADEQ GRANTS (from d above)	\$ <u>952,164.55</u>	<u>97.0</u> %
Local Sources:		
Hauler Licensing	\$ <u>3,875.00</u>	
Taxes	\$ _____	
Per Capita Fee	\$ _____	
Assessment/Tipping	\$ <u>23,928.33</u>	
Collection Fee	\$ _____	
Other*(Interest)	\$ <u>2,024.93</u>	
Total Local Revenue	\$ <u>29,828.26</u>	<u>3.0</u> %
Total Annual Funds	\$ <u>981,992.81</u>	<u>100</u> %

2.8. White River RSWMD Budget

2.8.1. The White River Regional Solid Waste Management Board has entered into an agreement with the White River Planning and Development District (WRPDD) to provide support services. Solid Waste Management is included in the WRPDD budget.

2.8.2. Solid Waste District grants and operations are approved by the White River RSWMD Board of Directors.

2.9. Public Education and Support

2.9.1. District programs and resources utilized for education and support: The District provides public education to elected officials, businesses and the general public in the areas of waste collection, disposal, waste tire recycling and disposal, waste reduction practices and community recycling programs including traditional recycling, electronics recycling, composting and special material recycling. Methods of providing this education include the District's web site (www.whiteriverrecycles.org), District Board meetings, workshops and contacts with area K-12 and post-secondary educators, media advertising, solid waste operator training programs, district-wide recycling forums, attendance at civic and community events, brochures, and other educational and promotional materials. An area-wide electronic newsletter is

distributed to educators and other interested persons. The District provides technical assistance to local officials, facility managers and service providers in solid waste planning and operations. District headquarters operate as a service center for internet and phone inquiries about proper disposal of specific items.

2.9.2. The District's web site is the central hub for information on all area facilities, programs and services that are available to elected officials, communities, businesses and residents. Its mission, authority, responsibilities and Board structure are listed on the web site. Notices of Board meetings, program updates, and grant opportunities are advertised in major newspapers throughout the ten county area.

2.9.3. See 2.9.2. above.

2.9.4. Public outreach efforts are listed in 2.9.1. and 2.9.2. above. District planning documents, certificate of need reviews, and grant programs are made known through legal advertisement in newspapers in all areas potentially affected by Board recommendations or actions.

2.10. Programs for Elimination of Illegal Dumping and Open Burning

2.10.1. The District works in partnership with local governments and property owners regarding site abatement. Landowners are notified of the law and of their responsibility regarding dump sites. Tire removal from sites is usually arranged through the District waste tire program. In the event that a property owner is unable or cannot afford to hire manpower and equipment needed to clean up a site, especially if the site poses a health or environmental hazard, the District and the local government jurisdiction work together to help the property owner with the clean-up.

2.10.2. As opposed to a formal mapping procedure, the District relies on its working relationship with county governments, law enforcement and area inspectors for information on illegal dumping. See 2.10.1. for programs in place to eliminate sites.

2.10.3. Licensed Illegal Dump Control Officers in the District area are Jan Smith and Sarah Sexton.

3.0 **Waste Categories**

3.1 Residential and Commercial Waste Estimation

Based upon the White River District 2010 Census population of 237,844

and U. S. EPA household and commercial waste estimates of 4.43 pounds per person per day, expected annual District waste totals are estimated as follows:

$$\begin{aligned} \text{Tons Per Day: } & 237,844 \text{ persons} \times 4.43 \text{ Lbs./Day} = 1,053,649 \text{ Lbs.} \\ & = 526,82 \text{ Tons} \end{aligned}$$

EPA Annualized District Tonnage Estimate: 192,289.3 Tons

Actual 2011 calendar year landfill numbers (adjusted to account for in District waste disposed of outside district boundaries and subtracting out of District waste disposed within district landfills) along with twelve month recycling and composting numbers, give a more accurate estimate of annual district waste is as follows:

	<u>Waste in Tons</u>
District Landfill Tons for 2011	109,211
Plus Waste Transported out of District	+44,785
Less Out of District Waste Transported In	-23,928
Recycled and Composted Waste (12 Mo.)	<u>+25,584</u>
Actual 2012 District Waste Generation	155,652*

*This does not taken into account one private industry landfill operating within the District, nor does it take into account the growing retail and industry trend of backhauling recyclable materials, particularly evident among discount stores, grocery stores, and industries in the area. Much of this information has not been made available to us in industry surveys.

3.2 Municipal Solid Waste Makeup

The table requested below is in no way an accurate representation of the actual amounts of waste generated in the White River District. It is only an estimate of what it would be if our rural ten counties were equal to the national average.

White River District 2010 EPA Estimated MSW Waste Stream Composition by Material in Tons

<u>Waste Type</u>	<u>Estimated 2010 Tons</u>	<u>Percent of Waste Stream*</u>
Paper and Paperboard	54,802.4	28.5%
Food Scraps	26,728.2	13.9
Yard Trimmings	25,766.8	13.4
Plastics	23,843.9	12.4
Metals	17,306.0	9.0
Rubber and Textiles	16,152.3	8.4
Wood	12,306.6	6.4
Glass	8,845.3	4.6
Other	<u>6,537.8</u>	<u>3.4</u>
District Total	192,289.3	100.0%

3.3 Industrial Waste Generation

The White River District does not have a large industrial presence in the state. Agriculture and forestry are the major industries in this rural service area, followed closely by tourism. Only six of the counties have what can be considered a larger (100+ employees) industry, and only fifteen larger industries exist within the entire ten county area.

3.3.1. Surveys were sent to all larger industries; however, only five have been returned, an insufficient number on which to base District-wide volumes. The potential proprietary nature of some types of industrial waste hampers this type of information sharing.

Of those who did respond, the vast majority of wastes were sent to in-District landfills for disposal. The exception to that rule is in White County, whose waste is sent to Rolling Meadows landfill in Hazen. Other wastes are shown as being recycled, with a small amount (oils and liquids) being handled by specialty environmental services such as Terra Renewal and January Environmental Services.

All waste going to class 1 and class 4 landfills in and out of the District is tracked through the area's transfer stations and landfills. These industrial volumes are accounted for in District totals. See 3.1. on the previous page.

3.3.2. See 3.3.1. above.

3.3.3. See 3.3.2. above.

4. **Waste Collection, Recycling and Disposal**

4.1. Landfills

4.1.1. See table below for information on District Landfills.

4.1.2. The following disposal facilities operate within District borders:

Landfill			Waste Source*	2011 Yr.	Life Exp.
<u>Name</u>	<u>Class</u>	<u>Area Served</u>	<u>In/Out of District</u>	<u>Tonnage</u>	<u>In Years</u>
IESI, Inc. 100 Landfill Rd. Cherokee Village, AR	I IV	North AR & South MO	In & Out of Dist.	78,089 0	58 36
Cleburne Co. 370 Harlan Lane Wilburn, AR 72543	IV	Cleburne Co.	In District	4,995	2.5
Jackson Co. 2069 Jackson 265 Amagon, AR 72005	I IV	Jackson & Adjacent Cos.	In & Out of Dist. In & Out of Dist.	13,729 4,866	28 14.8
White River R & R Conways Road Bald Knob, AR 72010	III-T	White River District	In & Out of Dist.	7,532**	6.6

All numbers in this table are based upon the AEIR 2012 Reports.

*Landfill tonnage is based upon what is disposed of in District landfills and does not track waste generated and disposed of outside of District lines. With the exception of some of the waste from White and Van Buren Counties, District class 1 and class 4 waste is disposed of in District landfills. Waste brought into District landfills from outside the area during the above reporting period totaled approximately 24,000 tons and is reported to the District by the Jackson County and Cherokee landfills.

**Number reflects only the tons of tires landfilled. In addition the District, through the services of the White River Regional Management Corporation, shredded 4,471 tons of District tires, approximately 50% of which were transported to Nucor-Yamato Steel Company near Blytheville, Arkansas. The shredded tires were used as waste to energy in the steel making process, with the steel in the tires being recovered and added as recycled steel in the operation.

The Cleburne County Class 4 landfill has a life expectancy of 2.5 years. A Certificate of Need for a major permit modification was submitted to ADEQ in 2008. The uncertainty of long-term class 4 disposal capacity in the southern part of the District is a major concern.

4.1.3. A map locating all White River District landfills is included in Appendix A.

4.1.4. Information is listed in the 4.1.2. table above.

4.2 Transfer Stations

4.2.1. See chart under 4.2.3. on following page.

4.2.2. See map in Appendix A.

4.2.3. The following transfer stations operate within the District:

<u>Transfer Station</u>	<u>Area Served</u>	<u>Materials Accepted</u>	<u>Material Disposition</u>
Cleburne Co. T. S. 154 Libby Road Heber Springs, AR 72543	Cleburne, White, Lonoke Faulkner Cos.	Class 1	IESI Cherokee Landfill
Independence Co. T. S. 110 Environmental Way Batesville, AR 72501	Indep., So. IZard, So. Sharp Cos.	Class 1 Class 4 Recy. Mat'ls.	IESI Cherokee Landfill IESI Cherokee Landfill
City of Newport T. S. Plum Street Newport, AR 72112	Newport City Only	Class 1	Jackson Co. Landfill
Stone Co. T. S. 174 Recycle Ctr. Rd. Mtn. View, AR 72560	Stone County	Class 1 Class 4 Recy. Mat'ls.	IESI Cherokee Landfill IESI Cherokee Landfill
Searcy T.S. 2012 East Line Rd. Searcy, AR 72143	City of Searcy White County	Class 1 Class 4	Rolling Meadows LF Rolling Meadows LF
Van Buren Co. T.S. 494 Volunteer Pkwy. Clinton, AR 72031	Van Buren Co.	Class 1 Class 4	Morrilton Landfill Morrilton Landfill
Woodruff Co. T. S. Hwy. 17 South Patterson, AR 72123	Woodruff Co.	Class 1	Jackson Co. Landfill

4.3. All Other Facilities

4.3.1. See listing under 4.4.1. below.

4.4 Facilities

4.4.1.1 – 4.4.1.4 Other facilities that operate within the District include:

PERMITTED COMPOSTING FACILITIES		Cu. Yds. in 2011
Searcy Compost Center	City of Searcy	CY Inbound: 71,673
1801 N. Main St. Searcy, AR 72143	Contact: Mark Lane (501) 279-1019	Outbound: 29,520

Searcy's Compost Center serves the city and White County population of 77,076. The remainder of the District is very rural in nature, and offers small community chipping and compost operations which do not meet the threshold for permitted operations.

The ten material recovery centers listed above also serve a large number of non-center based, community recycling programs, including the following communities: Ash Flat, Augusta, Bald Knob, Beebe, Cherokee Village, Greers Ferry, Hardy, Melbourne, Mammoth Spring, McCrory, McRae, and Patterson. Salem and Viola are Fulton County programs.

4.4.1.5. For a listing of disposal facilities and their remaining capacities, see 4.1.2.

4.5 **Solid Waste Collection Systems**

District cities and counties were surveyed in January 2013 to provide an overview of collection systems that serve District communities. Information from this survey is found in Appendix D, Table D-1. Due to the low number of completed surveys returned, this table is a compilation of information from surveys, telephone calls and previous year's data.

- 4.5.1. A table showing the collection systems in place for each municipality/county, monthly cost of service, disposition of material, and annual cost to the governmental unit can be found in Appendix D (D-1, Waste Collection Services Inventory).

4.6 Collection System Providers

The types of District collection service providers, frequency of pick-up and revenue collection types are listed in Appendix D, Table D-1. Solid Waste Collection Services Inventory.

- 4.6.1. Cost of Services – The cost of services varies greatly in White River’s rural ten county District. Most of the larger (and some smaller) municipalities either provide or subcontract for services, but much of the District is served by private trash services. The private service providers consider their pricing, customer account information and specific route information to be proprietary. Available cost information is listed Appendix D, Table D-1, Waste Collection Services Inventory.

- 4.6.2. Number of accounts per provider is considered proprietary by most private haulers and is not provided by many haulers. Of the approximately thirty-five commercial waste haulers in the White River District, only fifteen responded to the survey request. Of those not responding were the area’s two largest haulers. Estimated 2013 tonnage and accounts collected by the District in fall 2012 are reflected in Appendix D, Table D-2. Again, individual account information is considered proprietary and the District has not been given permission to publish this except in aggregate form. Aggregate numbers are available in Table D-2.

- 4.6.3. As with 4.6.2. above, volume of material by hauler to an end point facility is not available in the survey format. Based upon monthly averages, an estimated tonnage for calendar year 2013 has been included in Appendix D, Table D-2. The District monitors disposal of waste from within its boundaries, as is documented in Section 3.1. Waste disposition from hauler to transfer station or landfill is also monitored by the District to assure proper disposal. At this writing, thirty-five different private haulers operate 129 permitted vehicles in the ten county service area. The number of accounts served by each entity varies from 35 to 13,000+ households.

4.7. Waste Hauler/Transporter Information

Aside from local government sub-contacted waste services, the collection system providers and actual haulers are the same entity in the White River District. As stated in 4.6.1. above, private service providers consider their

account information to be proprietary and do not allow this information to be shared.

- 4.7.1. A listing of District waste haulers with contact information and number of permits issued is found in table form in Appendix D, Table D-3, 2013 Commercial Waste Hauler Permits.
- 4.7.2. See Appendix D, Table D-3, 2013 Commercial Waste Hauler Permits.
- 4.7.3. The permits assigned to each commercial hauler is found in Appendix D, Table D-3. Average tons per load is found in Appendix D, Table D-2.
- 4.7.4. A District wide map with street level detail on hauler coverage areas is not available. Maps were not included on those who did respond to the survey.
- 4.7.5. Materials transported are residential and commercial MSW, and Class 4 waste. Two operators haul drilling waste (sand and sludge) to a landfill outside of the District service area. Special industrial wastes such as waste oils are transported by specialized services outside of the District service area.

4.8. Import/Export Status

- 4.8.1. Two District transfer stations accept waste from within District boundaries and transfer it out of the District for disposal. Per their survey responses, numbers for calendar year 2011 are as follows:

<u>Transfer Station</u>	<u>Class 1 Tons</u>	<u>Class 4 Tons</u>	<u>Disposal Facility</u>
Searcy Van Buren Co.	27,724 7,895	9,166	Rolling Meadows, Hazen Morrilton Landfill

The District does not have any knowledge of municipal waste being transferred out of state.

- 4.8.2. Two District landfills accept waste generated from outside the District, the Cherokee Landfill and the Jackson County Landfill. During the 2012 calendar year a total of 23,928 tons of out of district waste was disposed of in these two landfills. Almost all out of district waste goes to the Cherokee Landfill in Fulton County. This volume has increased substantially since the Nabors Landfill near Mountain Home has been closed. Both the Cherokee and Jackson County landfills put all incoming waste in Class 1 cells, so no breakdown of Class 1 and Class 4

waste has been made available to the District.

- 4.8.3. The Searcy Transfer station is operated by WCA, which operates Rolling Meadows Landfill, where Searcy area waste is transferred. WCA provides haulers for this waste. The Van Buren County Transfer Station hauls its own waste to the Morrilton Landfill.

Executive Summary

E.1. Overview

The White River RSWMD has in place a solid waste system that meets the present needs of most District residents, with the exception of a small percentage of extremely rural and typically low income areas. In these areas, curbside waste collection is expensive to operate because of low population density and is often cost prohibitive due to low income residents who typically live in these areas. All but two of the District's ten counties have either a landfill or transfer station inside the county and meet the needs of residents who prefer to drop off their trash as opposed to hiring a trash service. Rural residents of the remaining two counties, Sharp and Izard, have access to private trash services.

E.2. Identification of Potential Areas of Need and Future Planning

- E.2.1. Collection: The District is served by approximately 35 different public solid waste haulers who operate 130 permitted trash trucks, ranging from large packers and roll-offs in more urban areas to smaller passenger truck operations. This average of 13 trucks per county meets the present needs of the District, given its mostly rural nature.

The District will continue to work with local governments and private operators toward improving collection services through regional approaches which offer greater economies of scale. In the more rural areas, efforts to strengthen the existing collection systems and encourage further development of rural waste collection systems will continue. Assuring the availability of local trash service is an ongoing objective.

- E.2.2. Disposal: The White River District has adequate disposal capacity for Class 1 waste in the two Class 1 landfills within its boundary. However, a Class 4 landfill in the southern part of the District has less than three years life expectancy based on current permit status. Without ADEQ approval of an expansion request, a serious need for Class 4 disposal facility will exist in this area of the District in the near future. The District will continue to monitor existing disposal facilities and will research potential new sites for Class 4 services in the southern part of the District in the event the current facility, Cleburne County Class 4 Landfill, is not granted additional disposal capacity. See Section 4.1.2. for specific

information about District disposal sites and capacities.

E.2.3. Recycling: The District's ten counties are served by ten recycling centers, eight of which are processing and shipping centers plus two satellite centers that feed materials into two of the larger centers. In addition, there are fourteen communities that offer recycling locally and transport materials to their area's recycling center. Curbside collection is county-wide in Independence County. Seven larger municipalities in other counties also operate curb side recycling collection. The District supports a regional approach to recycling, which has been successful. Recycling programs, especially rural programs where the cost of transportation is so expensive, experience an on-going struggle to cover the cost of their operation. This struggle becomes very serious when market values are down. It is the goal of the District to provide the technical and grant assistance needed to support center operations and to help insure long term sustainability. The District will work to develop additional community based recycling programs that will feed materials to the regional processing and shipping centers, which will help support long term sustainability.

E.2.4. Waste Reduction: The District continues to work with local governments to reduce the cost of municipal waste disposal by addressing waste reduction as a part of the solution. Reuse, recycling and composting are included in local waste reduction strategies. Aside from the financial benefits of waste reduction, on-gong education at the community level and in the District's education systems is an essential key to progress in long term waste reduction.

E.2.5. Special Materials: The District operates a District-wide waste tire collection, processing, recycling and disposal program. Approximately 50% of the District's waste passenger tires are shredded and recycled by Nucor-Yamata Steel. The shredded tires were used as waste to energy in the steel making process, with the steel in the tires being recovered and added as recycled steel in the operation. District plans are to continue the recycling relationship with Nucor-Yamata. Recycling volumes are determined solely by steel company demand. The amount of materials accepted by Nucor-Yamata affects the expected life of the District's tire monofill. At present, six years of life expectancy is all that exists with the monofill. That time frame could be substantially less if the volume of material going to Nucor-Yamata continues decreasing.

Electronic waste in the District is managed through a network of nine collection and shipping centers plus three satellite collection sites. These centers and four District e-waste van trailers for community and school based collection events meet the current needs of the District. At present District electronics are transported to Unicom at Texarkana, Texas for recycling and proper disposal of wastes. The future of

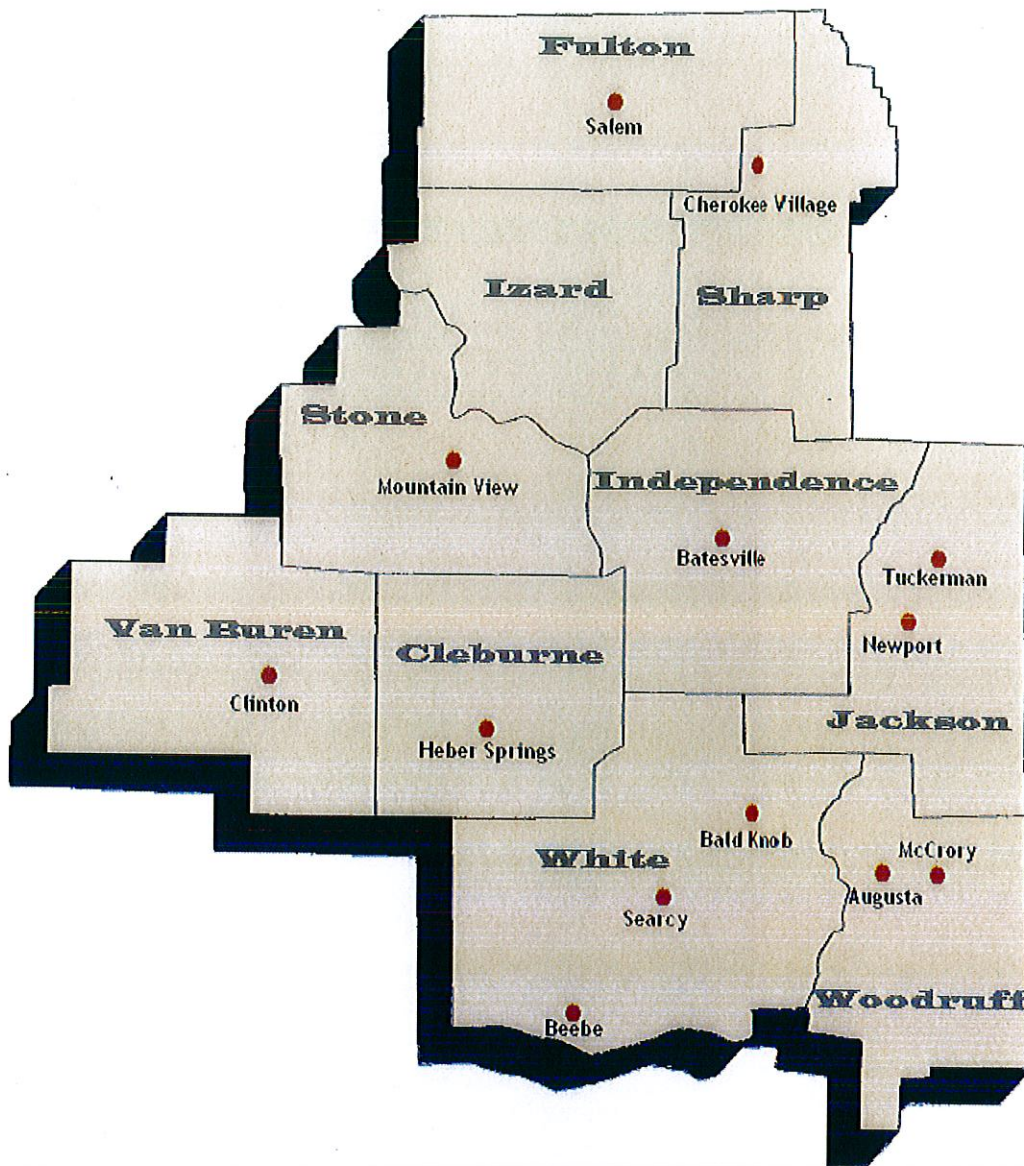

electronic waste recycling is of concern to the District. Though funding for transportation and to assist centers is currently available through the landfill post-closure trust fund, long term financial support of this program does not exist at present. Transportation costs alone for materials that have no substantial market value would bring the program to a standstill. The District will continue to monitor collections and funding for this program.

A drug drop-off program supported through District grant funds has been established District wide to handle both prescription and non-prescription drugs that should not be flushed into public waste water systems. This program is a partnership with local law enforcement and promises long term sustainability working the U. S. Drug Enforcement Agency for six month collection of materials which are disposed of in permitted incinerators.

The District will continue to address special materials – including but not limited to littering, illegal dumping, open burning and household hazardous wastes – through education, public awareness and technical assistance to cities and counties.

- E.2.6. Education and Public Awareness: District education programs include a variety of approaches: the District web site(WhiteRiverRecycles.org), roadway billboards, radio and newspaper releases and advertising, the District's e-mail newsletter, membership in local government groups, solid waste education material distributions to schools, and presentations and visits to schools, civic and community groups.

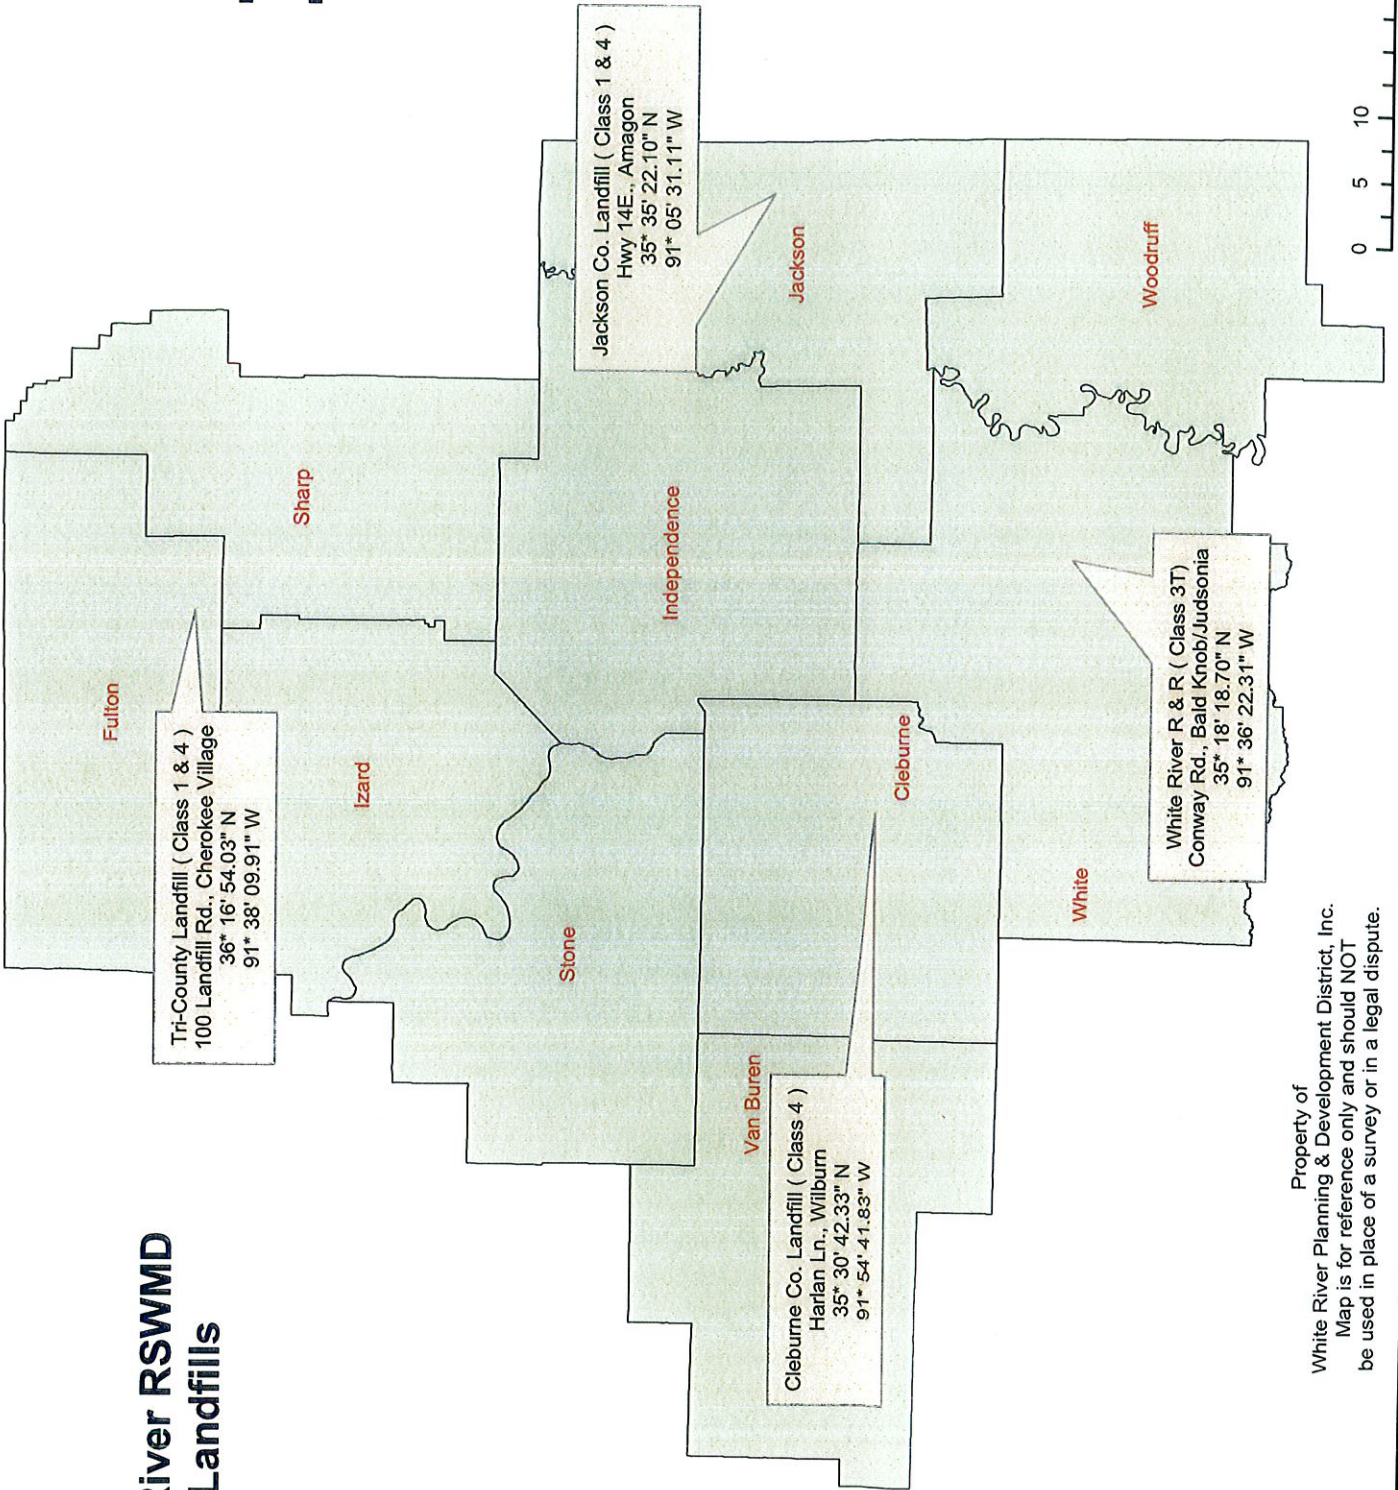

Education is necessary on an on-going basis to achieve responsible solid waste management long term. District plans are to continue development of a comprehensive public education program for all solid waste services, utilizing traditional and non-traditional education venues along with electronic media and expanded electronic resources for business, community and school information and education.

CHAPTER A: ADMINISTRATIVE PRACTICES AND PROCEDURES

Subchapter 1: General

§1.01 Authority

Arkansas Code Annotated § 8-6-704(6) authorizes regional solid waste management boards to adopt such rules or regulations pursuant to the Arkansas Administrative Procedures Act, § 25-15-201 et.seq., as are reasonably necessary to assure public notice and participation in any finding or ruling of the board and to administer the duties of the board.

The records of District activities, including any rule and procedures adopted by the Board of Directors, shall be maintained at the offices of the White River Regional Solid Waste Management District, P. O. Box 2396, 1652 White Drive, Batesville, AR 72501. These records shall be available to any citizen during regular business hours and as defined by the Arkansas Freedom of Information Act.

§1.02 Definitions

For the purpose of these regulations, the following definitions shall apply:

1. "Administrative Procedure Act" means the Arkansas Administrative Procedure Act codified at Arkansas Code Annotated §25-15-201 to 214, as amended from time to time.
2. "ADEQ" or "Department" means the Arkansas Department of Environmental Quality.
3. "Board" means the Board of Directors of the White River Regional Solid Waste Management District.
4. "Certificate of Need" means a certificate issued by the Board to any person proposing to obtain a permit for a solid waste facility.
5. "Certificate of Need Review" means review of the application for a Certificate of Need by the District.
6. "Class I waste" means household, commercial, and industrial; and small quantities of conditionally exempt hazardous waste.
7. "Class 3 waste" means non-hazardous commercial and industrial wastes that are permitted by the Department to be disposed of in a Class 3 landfill.
8. "Class 4 waste" means bulky, inert, non-putrescible wastes that do not degrade, or

degrade very slowly. Class 4 wastes include construction and demolition wastes, appliances, furniture, stumps, limbs and other bulky wastes that are not normally collected with other household or commercial waste.

9. "Commission" means the Arkansas Department of Pollution Control and Ecology Commission
10. "District" means the White River Regional Solid Waste Management District, which includes the counties of Cleburne, Fulton, Independence, Izard, Jackson, Sharp, Stone, Van Buren, White of Woodruff and the municipalities and unincorporated areas within those counties.
11. "Director" means the Director of the White River Regional Solid Waste Management District.
12. "Hauler" means a person engaged in the collection and/or transportation of solid waste, both Class I and Class IV, whether full or part-time, for storage and/or disposal. Hauler does not include a person transporting his/her own household waste to a permitted facility or a homeowner transporting his/her own Class IV waste to a permitted facility.
9. "Interested Persons" means any person who notifies the District of their interest in being notified of District activities and is on the District's mailing list.
14. "Landfill" means a permitted landfill under the Arkansas Solid Waste Management Act, Arkansas code Annotated §8-6-201 *et seq.* As used herein, the term does not include, however, permitted landfills where a private industry bears the expense of operating and maintaining the landfill solely for the disposal of waste generated by the industry or waste of a similar kind or character.
15. "Person" means any individual, partnership, corporation, L.L.C.S., association, or other similar entity(ies) or public or private organization of any character.
16. "Process waste" means solid waste resulting from an industrial/manufacturing and/or processing operation.
17. "Rule" means any District regulation or statement of general applicability and future effect that implements, interprets, or prescribes law or mandatory policy, or describes the organization, procedure or practice of the District.
18. "Solid Waste" means any garbage or refuse, sludge from a wastewater treatment plant, water supply treatment plant, or air pollution control facility, and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, commercial, mining, and agricultural operations, and from community activities, but does not include solid or dissolved materials in domestic sewage, or solid or dissolved material in irrigation return flows or

industrial discharges that are point sources subject to permit under 33 U.S. §1342, or source, special nuclear, or by-products material as defined by the Atomic Energy Act of 1954, as amended (68 Stat.923).

19. "Solid Waste Facility" means a Landfill as defined in this section or Transfer Station as defined in this section.
20. "Transfer Station" means any facility used to manage the removal, compaction and transfer of solid waste from collection vehicles and containers, and from other private and commercial vehicles to greater capacity transport vehicles. Transfer stations are not considered disposal facilities.

Subchapter 2: Procedure

§2.01 Procedure for Adoption of Rules and Regulations

The following procedure shall be utilized by the White River Regional Solid Waste Management Board (WRRSWMB) in promulgating any rule or regulation.

1. Prior to the adoption, amendment, or repeal of any rule or regulation, the WRRSWMB shall:
 - a) Give at least twenty (20) days notice of its intended action.
 - 1) The notice shall include a general statement of the issues to be discussed, the time, and the place for interested persons to present their views thereon; and
 - 2) The notice shall be published in the Arkansas Democrat Gazette.
 - b) Afford all interested persons reasonable opportunity to submit written data, views, or arguments prior to the consideration of the issue by the WRRSWMB. Further, if the WRRSWMB in its discretion shall so direct, oral testimony or argument may be received.
2. Notwithstanding the foregoing, if the WRRSWMB finds that an emergency exists and the public health, safety or welfare requires adoption of a rule or regulation upon fewer than twenty (20) days notice and states in writing its reasons for that finding, it may proceed without prior notice or hearing, or upon any abbreviated notice and hearing that it may choose. The rule may be effective for no longer than one hundred eighty (180) days.
3. Each rule or regulation adopted by the WRRSWMB shall be effective on the date or time set forth in the rule or regulation or, if no such date is set forth in the rule or regulation, then it shall become effective ten (10) days after adoption.
4. If any provision of any District rule or the application thereof to any Person or circum-

stance is held invalid, such invalidity shall not affect other provisions or applications or District rules, which can be given effect without the invalid provision or application, and to this end the provisions of all District rules shall be considered severable.

CHAPTER B: CERTIFICATES OF NEED

Subchapter 3: General

§3.01 Authority

Arkansas Code Annotated § 8-6-704(6) authorizes regional solid waste management boards to adopt such rules or regulations pursuant to the Arkansas Administrative Procedure Act, § 25-15-201 *et seq.*, as are reasonably necessary to assure public notice and participation in any finding or ruling of the board and to administer the duties of the board. Further, Ark. Code Ann. § 8-6-706(d) (7) authorizes Districts to adopt procedures for the issuance of Certificates of Need.

§3.02 Applicability

The regulations in this chapter (Chapter B) shall apply to all landfills and transfer stations proposed to be located either wholly or partially within the jurisdiction of the District or the expansion of any existing landfill within the jurisdiction of the District. A certificate of need is not required for landfills where a private industry bears the expense of operating and maintaining the landfill solely for the disposal of wastes generated by the industry or wastes of a similar kind or character.

Subchapter 4: Criteria and Procedure

§4.01 Criteria For Review

1. When reviewing an application for a Certificate of Need, the District will consider the following criteria:
 - a) Is the proposed facility consistent with the regional planning strategy adopted by the Board in the regional needs assessment or the regional solid waste management plan?
 - b) Will the proposed facility conflict with existing comprehensive land use plans of any local governmental entities?
 - c) Will the proposed facility disturb an archeological site as recognized by the Arkansas Historical Preservation Program or a rare and endangered species habitat as recognized by either the Arkansas State Game and Fish Commission or the United States Fish and Wildlife Service?
 - d) Will the proposed facility adversely affect the public use of any local, state or federal facility, including, but not limited to, parks and wildlife management areas?

- e) Will the proposed facility conflict with the requirements of state or federal laws and regulations on the location of disposal facilities?
- f) If located within a one hundred (100) year flood plain, the facility must not restrict the flow of a 100 year flood, reduce the temporary storage capacity of the flood plain, or result in washout of solid waste so as to pose a hazard to human health or the environment.
- g) For landfills, does the proposed facility provide landfill disposal capacity needed within the District? In no event shall the applicant's excess permitted projected capacity exceed thirty (30) years unless the city or county government within whose jurisdiction the proposed landfill is located authorizes approval of the excess capacity through the adoption of a resolution.

Along with the Certificate of Need for a landfill, the District shall provide to the Director an allocation of waste capacity for each permitted landfill within the District's jurisdiction in order to determine the design capacity of the proposed facility.

- h) For transfer stations, if a transfer station proposed to transfer waste outside the district in which it is located, the petition shall also contain documentation that the regional board of the district into which the waste will be transferred has been notified and has approved receipt of the waste. This provision does not apply to waste transfers outside the state.
2. The Board shall issue or deny the Certificate of Need based on an evaluation of:
 - a) the location of the applicant's proposed facility based on the district's needs and the highway and road system in the proposed site area;
 - b) the service area to be served by the proposed facility;
 - c) the detailed history of the applicant's record and that of the stockholders and officers with respect to violations of environmental laws and regulations of the United States or any state or political subdivision of any state; and
 - d) all other information provided by the applicant and whether the applicant followed procedure for obtaining a Certificate of Need in this section.
 3. The District will not consider the following when reviewing an application for a Certificate of Need:
 - a) the technical merits of the application related to the proposed or existing landfill or transfer station. Technical merits of an application will be determined by the ADEQ.
 4. Certificates of Need are issued to specific persons and for specific locations. Under no conditions or circumstances shall a Certificate of Need be transferred, assigned, or

otherwise provided to any individual or organization other than as originally specified on the Certificate of Need.

§4.02 Procedures for Obtaining a Certificate of Need

1. Application

A person requesting a Certificate of Need from the District must submit an application to the District, which will also serve as the applicant's notice of intent, as per Reg. 22, Section 300, Application Procedures. All applications for Certificates of Need shall include, at a minimum, the following information:

- a) the applicant's name, address, and telephone number;
- b) the name of the person having legal ownership of the land where the proposed facility will be located and documentation of the right to develop such property as a solid waste facility from the legal owner;
- c) the type and location of the proposed facility as shown on a topographic map and a state or county road map, including a legal description of the property;
- d) the size and capacity of the proposed facility;
- e) a description of the geo-political jurisdictions to be served, including population estimates by jurisdiction;
- f) documentation of information applicable to each of the criteria for evaluation listed in Section II. D., Procedures for Obtaining a Certificate of Need.
- g) for landfills, a statement from ADEQ concerning current and projected disposal capacity respective to the area and the solid waste district.
- h) other information deemed by the Board or Directors as necessary to make a determination of need.

2. Completeness Determination

Within fourteen (14) days of receipt of the initial application, the District will make a completeness determination of the application. Any additional information the District determines is necessary to make a decision on the need of the proposed facility will be requested within this time. If additional information is requested by the District, it will again make a completeness determination within fourteen (14) days of the receipt of the additional information.

3. Review Period

Once the District has determined that an application for a Certificate of Need is complete, the applicant will be notified and public notice of the review period will be placed in

papers of general daily or weekly circulation. The review period will begin on the date of publication of the notice of the review period. The review period will run for thirty (30) days. During the review period, public comment will be taken.

4. Public Hearing

During the review period, the District will conduct a public hearing within the county where the proposed facility or modification is to be located. The notice for the public hearing shall be made no less than ten (10) days in advance of the hearing.

5. Determination

- a) At the first scheduled Board meeting following the close of the review period, the Board will take up for consideration the application for a Certificate of Need.
- b) Unless the Board has affirmatively issued or denied a Certificate of Need within one-hundred and eighty (180) days from the beginning of the review period, the Certificate of Need will be deemed to have been denied.
- c) The Board shall issue written findings when making a determination. The findings shall state the basis for issuing or denying the Certificate of Need. The findings will be sent to the following:
 - 1) Applicant;
 - 2) ADEQ; and
 - 3) any interested persons who request such findings in writing from the District.

6. Appeal of Decision

Any interested person as defined in §1.02 to a Certificate of Need determination shall have the right to appeal the issuance or denial of a Certificate of Need to the Director of ADEQ in accordance with ADEQ regulations governing such appeals. Only interested persons shall have a right of appeal.

CHAPTER C: CERTIFICATE OF COMPLIANCE

Subchapter 5: General

§5.01 Description

The Certificate of Compliance program requires all persons seeking a compost or waste tire processing permit or waste tire collection center permit from the Arkansas Department of Environmental Quality to apply to the District for a Certificate of Compliance. The Certificate of Compliance is designed to ensure that solid waste facilities within the District are consistent with the District's Solid Waste Management Plan and to allow the Board of Directors the opportunity to comment on the proposed permit in a pro-active position rather than in a reactive stance. A Certificate of Compliance is not required for persons seeking a Certificate of Need.

§5.02 Authority

Arkansas Code Annotated §8.6.712(b) authorizes Districts to issue rules or regulations which are consistent with and in accordance with all applicable environmental protection performance standards adopted by state law or incorporated by reference from federal law.

§5.03 Notification by Applicant

The District should be notified in writing as to the intent of the person (s) who are applying for a solid waste permit from the ADEQ.

1. For existing permitted operations the request should specify:
 - a) the present nature of the operation;
 - b) the types of permit(s) currently held by the operation;
 - c) changes or additions to the permit (s) being sought by the person (s);
 - d) the geographic area affected by the permit(s) changes; and
 - e) other information as may be requested by the Director.

2. For new operations without existing permits, the request should specify:
 - a) the nature of the new operation and what materials will be processed;
 - b) the type of permit(s) for which the applicant will be applying;
 - c) the geographical area that will be affected by the permit(s);
 - d) the principal investors and/or owners and operator of the proposed facility; and
 - e) other information as may be requested by the Director.

Subchapter 6: Procedure

§6.01 District Staff Responsibilities

Upon written notification the District staff will:

1. Research the application for the proposed new facility and/or changes to existing facilities for compliance with the District's Solid Waste Management Plan and/or Waste Tire Management Plan;
2. Determine the completeness of the application, request additional information if merited, and prepare written material for presentation to the Board; and
3. Present the material to the Board at the next regularly scheduled meeting or, if circumstances require and with authorization from the Board Chairman, poll the board for an informal vote. Said vote to be made formal at the next regularly scheduled meeting.

§6.02 District Board Decisions

The decision to issue a Certificate of Compliance will rest with the Board of Directors. The following conditions apply:

1. Only the Board shall have the authority to issue a Certificate of Compliance;
2. All decisions by the Board are final;
3. An applicant whose request for a Certificate of Compliance is denied may, within thirty (30) days, make an appeal to the Board for reconsideration providing new information is available or a question of procedure arises, and
4. Upon approval, the Board's Chairman shall issue a letter indicating the approval of the applicant's request and that said permit is in compliance with the District's Solid Waste Management Plan and/or Waste Tire Management Plan.

CHAPTER D: WASTE HAULER LICENSING PROGRAM

Subchapter 7: General

§7.01 Purpose and Authority

The White River Regional Solid Waste Management Board is required by Act 752 of 1991 to enact and enforce a licensing program for all haulers who collect or transport solid waste in the District. The purpose of these requirements is to ensure the continued health and safety of citizens residing in the District by providing for a uniformly safe method of collecting and transporting solid waste, and assisting the District in developing a data base essential for planning, evaluation, and management of solid waste within the District's geographic boundaries.

Arkansas Code Annotated §8-6-721, Licensing Haulers Of Solid Waste, requires regional solid waste management districts to establish and maintain a program for licensing haulers of solid waste within their respective jurisdictions and sets minimum standards for said licenses. ADEQ Regulation #22, Section 22.203 sets certain minimum requirements for licensing of solid waste haulers. The following are the requirements for any person who hauls solid waste, either Class 1 or Class 4, inside the geographical boundaries of the District.

§7.02 Scope of the Program

1. A person, as defined in §1.02, who engages in the business of hauling solid waste must obtain a license from the White River Regional Solid Waste Management Board if:
 - a) the person collects Class 1 or Class 4 solid waste within the District; or
 - b) the person transports Class 1 or Class 4 solid waste for storage or disposal within the District.
2. A license may be issued to a person, partnership, corporation, association, the State of Arkansas, a political subdivision of the state, an improvement district, a sanitation authority, or another regional solid waste management district. The District may in the future engage in the hauling of solid waste within its own boundaries without licensure but will comply with all applicable standards required in this section.

For the purpose of this program, these standards will apply to solid waste haulers that collect or haul Class I or Class IV waste. A license shall not be required for an individual hauling their own household waste to a permitted facility.

3. Licenses will be issued by the District when all aspects of the application have been completed, compliance with ADEQ standards for hauling solid waste have been achieved, and all fees have been paid.

4. Local governments and solid waste districts shall be exempt from this license requirement.

Subchapter 8: Requirements and Fees

§8.01 Licensing Standard and Requirements

Any person who transports solid waste, either Class 1 or Class 4, shall:

1. possess the appropriate driver's license as defined by Arkansas Law; and
2. annually register all collection vehicles within the District, providing the following information:
 - a) name, address, social security number (or tax ID# if incorporated) and telephone number of registrant,
 - b) make, model, year and VIN of vehicle(s),
 - c) license plate number,
 - d) copy of operator's license of all participating drivers,
 - e) description of the class and origin of the waste, size of the loads hauled and their destination, and
 - f) financial assurance in the form of proof of vehicle liability insurance.

§8.02 Requirements for Maintaining Permits

All collection and transportation vehicles must meet the conditions outlined below. Failure to comply with these conditions may result in revocation of hauler license.

1. Solid waste shall be collected and transported so as to prevent public health hazards, environmental hazards, safety hazards and nuisances.
2. Collections and transportation equipment shall be designed and constructed so as to be leak-proof. The waste shall be suitably enclosed or covered so as to prevent roadside littering, attraction of vectors or creation of other nuisances, and shall be in compliance with state law.
3. Collection and transportation vehicles shall be kept in a sanitary condition.
4. Regular collection days shall be established as appropriate. Collection shall be performed as necessary.
5. Collection and transportation of chemicals, poisons, explosives, radiological waste, and other hazardous materials shall be in accordance with the requirements of state and federal regulatory controls.

6. All solid waste collected within the district shall be transported to an approved facility licensed with ADEQ or with the state to which it is being transported.
7. All vehicles covered by these regulations must prominently display a current license registration sticker provided by the District.
8. Said waste hauler licenses shall be non-transferable and non-returnable.
9. Haulers will be required, upon reasonable notification by the District, to provide the District with records and data on the nature of waste collected or transported; or provide any other information as requested to help the Board track the composition, volume and flow of solid waste.
10. Haulers will abide by all Federal, State, and Local laws and ADEQ and District regulations regarding the collection, hauling and disposal of solid waste.

§8.03 Financial Responsibility

Any hauler applying for a license must establish and maintain financial responsibility to the Board by annually providing proof of commercial or vehicle liability insurance with minimum coverage as required by state law.

§8.04 Fees

1. The White River Regional Solid Waste Management Board shall assess the following annual fees for licensing the collection and transportation of solid waste in the District. Said fees shall be non-transferable and non-refundable.
 - a) Vehicles of 1 ton or less shall be subject to a \$25.00 annual fee per vehicle.
 - b) Vehicles of over one ton shall be subject to a \$50.00 annual fee per vehicle.
2. Upon payment of the fee, each vehicle registered will be provided with a license to collect and transport solid waste in the District.
3. Licenses must be renewed annually with the license year beginning January 1. If a new hauler is issued a license after January, the fees will be prorated based on the number of full months remaining in the calendar year.
4. Haulers will have 30 days to obtain a license without penalty. Failure to obtain a license by February 1st will result in doubling the fee.

CHAPTER E: WASTE TRANSFERS

Subchapter 9: General

§9.01 Purpose and Authority

Movement of waste either in or out of the boundaries of the District shall comply with Arkansas Code 8-6-712, Regulation of Solid Waste Disposal.

CHAPTER F: HOST FEE

Subchapter 10: General

§10.01 Purpose and Authority

The purpose of these requirements is to allow the District to evaluate and maintain adequate landfill capacity for the use of its citizens, to monitor the amount of solid waste being deposited into its landfills from outside the District, and to provide funding to stabilize the amount of solid waste being deposited in District landfills from within the District.

Arkansas Code Annotated 8-6-714, Rents, fees and charges, provides regional solid waste districts with the authority to "...fix, charge, and collect rents, fees, and charges for the disposal, treatment, or other handling of solid waste by the district."

Subchapter 11: Fee Structure

§11.01 Fee Structure

Effective April 1, 2004, a host fee of \$1.00 per ton will be charged, collected by the District's landfills, and submitted on a monthly basis to the District offices by the 10th of the following month on all solid waste originating from outside the District and deposited in a District landfill.

CHAPTER G: ILLEGAL DUMPS PROGRAM

Subchapter 12: Purpose and Authority

§12.01 Purpose and Authority

The primary purpose of the District's illegal dumps program is to remediate illegal dumps using the resources of the perpetrator(s) responsible for the illegal dumping. The secondary purpose, though not a lesser purpose, is to eliminate a health problem by the remediation of illegal dumps. Improper and illegal waste disposal places the public health at risk. Carelessly disposed solid waste allows for the contamination of surface and ground water due to uncontrolled leachate entering the surface and/or ground water systems. Additionally, this waste is a breeding ground for vectors that are known to carry disease. Both of these conditions create an unhealthy environment with the potential for serious health risk.

The Board of Directors is given authority to address illegal dumping through the following:

1. Arkansas Department of Environmental Quality's Regulation #22;
2. Arkansas Code Annotated §8-6-508 Enforcement Generally, which empowers solid waste management districts to employ illegal dump control officers and establishes their powers and duties; and
3. Arkansas Code Annotated §8-6-901 Licensing of Operators of Solid Waste Management Facilities which provides for the certification of the illegal dumps control officers.

CHAPTER H: SEVERABILITY

Subchapter 12: Severability Policy

§12.01 Severability Policy

If any portion of these rules or regulations is found by a court of law to be unconstitutional, it shall not negate the remainder of these rules or regulations.
